Testimonials

“ In the last ten years, I have overseen projects from a few hundred dollars to multi-million dollar Fortune 100 contracts. This project has been one of the finest consulting experiences I have ever seen, bar none. The level of professionalism, the quality of work, the level of communication, were all superior to the vast majority of contractors I’ve used locally in the Bay Area. This project was large and complex (the requirements documentation was over 100 pages). They exceeded every expectation and met every requirement. Their code was delivered virtually bug free. The turnaround time was outstanding. They warrant the work and don’t squabble over pennies. I will definitely use them again. I highly

”

Kharkov is the second largest city in Ukraine. Its population is over 1,500,500. Kharkov is one of the main industrial, cultural and educational centers of Ukraine. Its industry specializes mostly in scientific research, arms production and machinery. Kharkov is one of the most prolific centers of higher education and research of Eastern Europe. The city has 13 national universities and numerous professional, technical and private higher education institutions, offering students a wide range of disciplines. Kharkov is served by an international airport which used to have about 200 flights a day.
